

FOAM SUPPRESSOR S**DESCRIPTION**

Foam Suppressor S - a mixture of high molecular weight silicones suspended in patented aqueous solutions and used mainly as defoamer.

GENERAL PHYSICAL CHARACTERISTICS

| | |
|--------------------|----------------------------|
| Appearance | White opaque liquid |
| Density | at 20°C 0.96 - 1.06 |
| Flash point (PMCC) | above 65°C |
| Viscosity | at 20°C less than 1000 Cps |
| Freezing point | -5°C |
| pH | 6.0 - 7.0 |
| Solubility | Soluble in water |

APPLICATION

Defoamer S is effective in all water-based drilling fluids, including zinc bromide solution.

Foamer S is equally effective in solids and non-solids drilling fluids.

Foaming Agent S can be diluted with water for better foam control and does not require additional water dilution equipment.

PRECAUTIONS

Avoid contact with eyes, skin and clothing. In case of eye contact, rinse immediately with water for 15 minutes and seek medical attention. Wash contaminated clothing immediately.

PACKING

Defoamer S is available in 55 gallon (208 L) tanks and 5 gallon (18.9 L) canisters.
